Mr. Ford,

We saw legal advertisements in the Macon Telegraph last Saturday that show ROW ownership uncertainties that GDOT is attempting to clarify. Are these properties (addresses not listed in the advertisement) related to the Forest Hill Road project? Since (60) days notice is given in these advertisements, would it not be prudent for GDOT to await the resolution of property ownership before awarding bids for this project?

Please let us know if GDOT plans to press forward and award bids on December 14th as mentioned in the email below. Because, if this is the case, I will file on that same day a <u>Complaint for Injunction</u> and Temporary Restraining Order in Bibb County Superior Court.

Thank-you, - Lindsay Holliday FHR Mediation Team

A survey for relict trillium, fringed campion, or Ocmulgee skullcap was performed in 2011. The consultants had a biologist from the US Fish and Wildlife Service, accompany them on the survey, and it was determined that there is not habitat for any of these species in the project footprint. Additionally, the below article does not reference the Forest Hill Rd project area, the only referenced location denoted is a wooded area off of Vineville Avenue.

The noted project is scheduled for letting to construction on December 14, 2012.

Thanks Clinton
